Engineered Slitting Solutions

ASKO makes doing business easy!

If you're looking for one company that can provide the entire scope of slitting products, services, and knowledge you need, Ask ASKO.

Whether your requirements are limited to affordable replacement parts, or include a complete slitting solution, ASKO can help. Our application experts – backed by 70 years of experience – will recommend the exact grade, hardness, dimension, tolerance and finish to perfectly slit any material you're processing, in a way that adds value to your finished product.

For details on ASKO's superior–performing grades and tolerances for your application, see our web site, or call us today to request our comprehensive Slitter Tooling Technical Brief.
Ask ASKO about Performance

**ASKO Slitter Knives**

For better edge quality and tighter tolerances, ASKO manufactures slitter knives custom designed for your application. Details on the right grade and design — whether for the heaviest gauge steel or the lightest gauge non-ferrous metal — start with ASKO’s in-house metallurgists. Get details in the ASKO Slitter Tooling Technical Brief.

**Acculite™ Spacers**

ASKO’s Acculite steel polymer composite spacers are as much as 70% lighter than traditional spacers while maintaining the same performance characteristics. Acculite spacers reduce operator fatigue and injuries caused by lifting heavy solid steel spacers, and speeds the set-up process so you run longer and faster. Only Acculite spacers provide patented 360° contact to avoid “knife wobble” common with other lightweight designs.

**Special Finishes Available**

ASKO knives and spacers are available with lapped, ground, superfinished or polished surfaces, and with matte or highly reflective finishes. These finishes can increase run times and product quality.

**ASKO Shear & Scrap Chopper Knives**

ASKO shear and chopper knives are available in grades and designs for every metal shearing application. Special knife materials have been developed by ASKO for all shearing applications, from light-gauge to heavy-gauge, high tensile material. ASKO’s in-house metallurgists are available to assist with the specification of the correct knife for your application.

**EdgeMaster Shimless Tooling Sets**

ASKO shimless tooling sets produce the most accurate slitter set-ups possible. ASKO tooling exceeds every industry spec, and when used in conjunction with ASKO’s patented EdgeMaster software, provides the fastest, most accurate set-ups to increase productivity and optimize product quality.
**EdgeMaster Set-Up Software**

EdgeMaster improves slit edge quality, speeds the set-up process, and improves set-up accuracy. It copes with the unique demands of any coil processing operation. Because of its intuitive interface, operators can use it without training.

**New for EdgeMaster™ (3.0)**

- Configuration Wizard to help with initial setup and adjustments
- Simplified knife management program
- Export knife management and swim data to Microsoft Excel®
- Enter multiple setups at one time
- Combine 2 setups to save setup and take-down time
- Print barcodes for setups

**Amtec Hydraulic Nuts & Precision Pumps**

Amtec hydraulic nuts from ASKO — available in steel or lightweight aluminum — are durable, leak proof and deliver the industry’s highest reliable pressures. Used with precision pumps, they provide precise and repeatable clamping forces to ensure accurate slitter and side trimmer set-up. Amtec nuts are the preferred arbor locking system of quality-conscious slitter operators.

**ASKO Spacers**

ASKO spacers are manufactured from high quality alloy steels and meet or exceed the industry’s most exacting tolerances. Alternative material grades are available for special applications.

**ASKO Snug Fit or Bonded Stripper Rings**

ASKO offers stripper rings for every metal slitting application, manufactured from solid or composite materials including alloy steel, Buna-N, neoprene or polyurethane. Our engineers work with you to design and manufacture stripper rings in the proper material, size and hardness for your application.

**GET EDGE**

**EdgeMaster System**

**Amtec Hydraulic Nuts & Precision Pumps**

Amtec hydraulic nuts from ASKO — available in steel or lightweight aluminum — are durable, leak proof and deliver the industry’s highest reliable pressures. Used with precision pumps, they provide precise and repeatable clamping forces to ensure accurate slitter and side trimmer set-up. Amtec nuts are the preferred arbor locking system of quality-conscious slitter operators.

**ASKO Spacers**

ASKO spacers are manufactured from high quality alloy steels and meet or exceed the industry’s most exacting tolerances. Alternative material grades are available for special applications.

**ASKO Snug Fit or Bonded Stripper Rings**

ASKO offers stripper rings for every metal slitting application, manufactured from solid or composite materials including alloy steel, Buna-N, neoprene or polyurethane. Our engineers work with you to design and manufacture stripper rings in the proper material, size and hardness for your application.
ASKO Overarm Separator Tooling

ASKO manufactures overarm separator discs and recoiler plates from long-wearing, hardened alloy grades. ASKO offers overarm spacers in a variety of materials including steel, aluminum, micarta, nylon and polyurethane. ASKO provides a variety of surface finishes according to your application requirements.

ASKO Plastic Shims

Every component in your arbor set-up is critical to your ability to produce a quality edge. For traditional “standard” tooling set-ups, ASKO provides high quality, accurate plastic shims.

ASKO Transfer Boxes & Cabinets

ASKO custom-designed tooling storage cabinets, knife storage and transportation boxes protect your tooling investment.

ASKO Reconditioning Service

ASKO reconditioning and regrinding services restore your knives, stripper rings and spacers to the original specifications and tolerances or better. ASKO also provides shims and bolts for shear knives and performs custom grinding for your special requirements.

Training Seminars and Technical Assistance

ASKO offers customized training seminars to improve your slitting and shearing knowledge and expertise. Let ASKO train your personnel in the most cost-effective manner. Visit www.askoinc.com for details on our seminars.
ASKO makes doing business easy!

If you’re looking for one company that can provide the entire scope of slitting products, services, and knowledge you need, Ask ASKO.

Whether your requirements are limited to affordable replacement parts, or include a complete slitting solution, ASKO can help. Our application experts – backed by 70 years of experience – will recommend the exact grade, hardness, dimension, tolerance and finish to perfectly slit any material you’re processing, in a way that adds value to your finished product.

For details on ASKO’s superior-performing grades and tolerances for your application, see our web site, or call us today to request our comprehensive Slitter Tooling Technical Brief.
